Subject: RE: Apollo/Scio emails

We still have to figure out a few logistics.

Because of the size of the database, it is going to have to be housed in Relativity at the LTSC instead of loaded into Eclipse here. Unfortunately, that can be a lengthy process. My guess is that there will be nothing available for us to review until the week after next, and possibly the week after that. This sucks, but we don't have an alternative.

Once it is loaded in Relativity, we plan on running a list of search terms to determine the universe of potentially privileged documents. If the search results in a manageable number of documents, that is the universe that you will review. If there are too many hits, we will back up and first do a relevance search and follow that with the same privilege search, which will result in smaller universe.

Short answer is that, once we have a database of documents for you to review, it should not be too many documents. For planning purposes, I'm guessing that you won't have anything to review for at least 2-3 weeks. We'll keep you updated along the way as to timing, but I don't think that you need to set aside too much time.

John – you disagree with any of this?

Subject: ADAMS - Search Terms for Privilege Filter.docx

Here is my initial cut at a list of search terms that could be used to filter the potentially privileged documents in the email database. Once you've reviewed, let me know, and we can shoot to Tim for his input.

CONFIDENTIAL - Not to be
Released for Public...

SEARCH TERMS TO ISOLATE POTENTIALLY PRIVILEGED DOCUMENTS
ADAMS/MONAHAN

[AS OF 4/14/2016]

General Terms

privilege!
attorney
lawyer
advice
counsel
acp
“work product”
“law firm”

Terms related to law firms used by Apollo/ADGC/Adams

adamsmonahan
adamsgrumbles
sankovitz
amllp
wc.com
merchantgould
zouvas
dorsey
“K&L”
klgates
schwegman
slwip

Maria, David (USAMN) 1

From: Maria, David (USAMN) 1
Sent: Tuesday, April 26, 2016 2:15 PM
To: Rank, Timothy (USAMN); Kokkinen, John (USAMN)
Subject: Adams Privilege/Taint Review

Dan ran the search terms, and the "general" search terms ("privilege!", "attorney," etc.) were hitting on 70-80% of the documents, due in large part to standard disclaimers that appeared on many/most of the emails.

The more specific terms also had a substantial amount of hits. The specific terms used and the number of each are set forth below:

TERM	Doc Hits
adamsgrumbles	1,495
adamsmonahan	8,003
amllp	1,733
anthonyostlund	15
dorsey	2,438
fredlaw	89
fredrikson	633
K&L	174
klgates	34
kopecky	306
ksblegal	328
latham	3,968
lw.com	3,134
merchantgould	94
sankovitz	1,299
schwegman	1,531
sikora	736
slwip	1,394
watkins	3,604
wc.com	96
zouvas	1,006
Total	32,110

Because our specific search term list was comprehensive, I believe that we are okay just sticking with these terms and dispensing with the general terms. My suggestion would be to segregate/eliminate from our review all of the documents that hit on all of the specific search terms except for "adamsmonahan," "adamsgrumbles," "amllp," and "zouvas," as they were all firms that performed legal work for Apollo/Scio, or are firms that have assisted in defending Adams and Monahan in connection with the SEC action (and our investigation). We would then have the taint team review these approx. 12,000 documents for privilege, releasing to us those that are determined not to be privileged. If we think that 12,00 docs are too many for the taint team to review, we can come up with "relevance search terms" to cull this down to a more manageable number.

Thoughts on this? If everyone is good with this approach, we should be able to open up for review the database with the documents that did not hit on these search terms.

Obviously, this will be an ongoing process to identify potentially relevant documents, and, if we see additional firms or lawyers show up in the emails, we can run searches to segregate these documents.

Cc: Kokkinen, John (USAMN)
Subject: Scio Update

All,

Two things:

1. We have run search terms on the email database to try to segregate potentially privileged documents. We are still trying to refine the database that contains the potentially privileged docs, but the good news is that the larger database should be available for our review very soon. Once it is ready and available, I will let everyone know. Does everyone have access to Relativity? If not, let me know, and I can let you know what you need to get a logon, etc.

- 2.

Call me if you want additional details or have any questions.

I also saw that Hopeman had done some work for him before, so we need to add Hopeman, as well as the "@felhaber" that you note below.

Additionally, it looks like he had a guy working on his tax issues – Tom Brever. We will add Brever as well as @fosterbrever.com. He also had a civil litigation matter with Tamburino from Caplinlaw. He may have been opposing counsel, but it is not relevant for our purposes, so we will add those also.

We need to do a little research on our end, as well as have a conversation with Scio's current counsel, to figure out some of the issues like he Bland-Richter one. I'm assuming that we will be able to review those materials though, as they already turned over the Nelson Mullins report, etc.

Dan,

We need to run one more set of search terms on the "Adams II" email database in Relativity. This should be the final set. These are our search terms to cull this down to relevant documents. Unlike the searches that we ran for potentially privileged documents, the docs that hit on these search terms should remain in the database, and those that don't should be excluded. Once you have run them, let me know, and I will do some spot checking based on certain documents that I have already pulled.

Here are the terms:

Apollo
Diamond
ADI
ADGC
Gemstone
DL
RL
ADR
RBE
ESA
MRM
Scio
SDTC
Krossbow
Linares
Lancia
Zipkin
Nichols
LisaL
LMAInc
Mack
Rapello
Platt
Robb
Larson
McMahon
Bern
McPheely

Let me know if you have any questions.

Hannah,

The emails that we received for this case through a search warrant used to show up under Relativity, which I am able to access from my computer at the FBI. They are no longer showing up. Do you know what happened to them? Did they get moved to a different project? Please let me know when you have a chance. Thanks!

when you first login you should see a list of workspaces that you have access to that has both projects. If you are already logged in you can click on the downarrow next to your name in the top right corner and click on "Home" to get to the project list.

LTSC Litigation Work Plan Approval Request

Work Order: C1948W9751(Ref#:EDQARD ADAMS II)
Case Name: Edward Adams
Work Due On: 4/14/2016

To: Dan Czapko

Thank you for submitting a Preliminary Work Order (PWO) to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your PWO, we request your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #44020:
Standard EDD processing will be applied including conversion to TIFF with extracted metadata and text.

Utilize the NIST database to remove system files from processing.

De-duplication will be at the CUSTODIAN level while maintaining the compound files. This will ensure that families will be maintained during processing.

Excels will include extracted text.

.EXE and Non-NIST application files will be excluded from processing.

Image placeholders will be applied for certain document types (hybrid/mixed) – Excel, XML, MS Access, Publisher, Microsoft Project, AutoCad, Quickbooks, unknown files, all Audio/Video files (i.e. WAV, MP3). The Relativity “placeholder” field will be populated with a “Y” for these documents types.

The LTSC will limit images to the first 1,000 pages of each document. If you would like all of the pages of the document imaged, please let us know promptly.

Processing will be in Black & White.

Processing time zone will be set to Central Standard Time.

CUSTODIAN field will be populated per folder in the zip file delivered:

Edward S Adams

Jafman1

Michael Monahan

Unendorsed control number will begin with 00000001.

Configure a new Relativity workspace named Edward Adams_II.

Documents will be foldered Edward Adams_II.

Data will be processed with Relativity Structured Analytics.

A Content Analyst index will be created.

Summary of Work

For work order "C1948W9751(Ref#:EDQARD ADAMS II)," we will be processing 1 container of the following type: "Electronic Folder." We will be applying a label to each container received.

1 Electronic Folder will be processed with "Process Natives" and the following tasks will be performed:

- Inventory
- Staging
- Project Setup
- Peer QC of Project Setup
- Processing: Unpack Natives
- Processing: Extract Text, Images and/or Natives

- Peer QC of Processing
- Export
- Create Hosting Job
- Coordinator QC/Sign-off

+++++

IMPORTANT NOTICES: READ BEFORE APPROVING

• **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

• **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

• **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the

documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Work Order Completed

Dear Dan:

Your service request for LTSC processing, work order #C1948W9751(Ref#:EDWARD ADAMS II), has been fulfilled.

Please see the note below from Marc Fulkert, who invites your feedback on the work recently completed by LTSC ([click here](#) to complete the online feedback form and also feel free to contact me directly):

As the Litigation Technology Service Center COR, I would greatly appreciate any / all feedback so that we may continually improve our effort to meet the eDiscovery and document imaging needs of all USAOs going forward.

LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE

REQUESTS: The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Work Due On: 5/2/2016

To: Dan Czapko

Thank you for submitting a Preliminary Work Order (PWO) to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your PWO, we request your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #44805:

The LTSC will create a new secured folder named "Taint Review". This folder should be accessible to the district admins.

Results of the following saved searches will be moved into the "Taint Review" folder:

Pot Priv - adamsgrumbles
Pot Priv - adamsmonahan
Pot Priv - amllp
Pot Priv - zouvas

For LTSC Container #44806:

The LTSC will create a new secured folder named "Not For Review". This folder should be accessible only to the LTSC.

Results of the following saved searches will be moved into the "Not For Review" folder:

Pot Priv - anthonyostlund
Pot Priv - dorsey
Pot Priv - fredlaw
Pot Priv - fredrikson
Pot Priv - K&L
Pot Priv - klgates
Pot Priv - kopecky

Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

• **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

• **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has*

requested be loaded into a hosting platform (i.e., Relativity or iCONNECT) , will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

LTSC Litigation Work Plan Approval Request

Work Order: C1948W10173

Case Name: Edward Adams

Work Due On: 5/2/2016

To: Dan Czapko

Thank you for submitting a Preliminary Work Order (PWO) to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your PWO, we request your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #44805:

The LTSC will create a new secured folder named "Taint Review". This folder should be accessible to the district admins.

Results of the following saved searches will be moved into the "Taint Review" folder:

Pot Priv - adamsgrumbles

Pot Priv - adamsmonahan

Pot Priv - amllp

Pot Priv - zouvas

For LTSC Container #44806:

The LTSC will create a new secured folder named "Not For Review". This folder should be accessible only to the LTSC.

Results of the following saved searches will be moved into the "Not For Review" folder:

Pot Priv - anthonyostlund

Pot Priv - dorsey

Pot Priv - fredlaw
 Pot Priv - fredrikson
 Pot Priv - K&L
 Pot Priv - klgates
 Pot Priv - kopecky
 Pot Priv - ksblegal
 Pot Priv - latham
 Pot Priv - lw.com
 Pot Priv - merchantgould
 Pot Priv - sankovitz
 Pot Priv - schwegman
 Pot Priv - sikora
 Pot Priv - slwip
 Pot Priv - watkins
 Pot Priv - wc.com

Summary of Work

For work order "C1948W10173," we will be processing 2 containers of the following type: "Electronic Folder." We will be applying a label to each container received.

2 Electronic Folders will be processed with "Relativity Folder Updates" and the following tasks will be performed:

- Coordinator Review and Assign
- Create New Secured Folder
- Move Documents
- Tech QC of Deliverable
- Coordinator QC/Sign-off

The following hosting jobs will be completed:

- **W10173-19306:** 0.00 GB consisting of 11381 docs, 0 pages, and 0 native files loaded to Relativity
- **W10173-19305:** 0.00 GB consisting of 10457 docs, 0 pages, and 0 native files loaded to Relativity

+++++

IMPORTANT NOTICES: READ BEFORE APPROVING

- **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as

appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

- **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

- **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, *you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request.* If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

To: Czapko, Daniel (USAMN); Zeitz, Mark (USAMN)
Subject: W10173 Edward Adams - Refoldering questions

Hi Dan and Mark.

We need some clarification on the secured re-folding request for Edward Adams:

1 - Looks like neither of the searches include families - if we move forward as-is, groups will be split and family items of the search hits will be unsecured. And of course, depending on whether the family items are parent or child, it's possible that items intended to be secured may still be available natively via the unsecured items. Is this your intent? I combined your "Pot Priv" searches into the two below searches for reference.

W10173_Not For Review - 10,457 hits; 18,368 hits with family
W10173_Taint Review - 11,381 hits; 19,367 hits with family

2 - There are 1,213 items that are returned by both searches (3,070 if you include families). How are these items to be handled given that the destination folder permissions are different?

Thanks,
Robin

Work Order: C1948W10546(Ref#:01 Potential Privilege - All)
Case Name: Edward Adams
Work Due On: 6/10/2016

To: Dan Czapko

Thank you for submitting a Preliminary Work Order (PWO) to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your PWO, we request your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #45437:

In the Edward Adams_II workspace, documents in the results of saved search "01 Potential Privilege - All" will be moved to the secured folder "Not For Review". The folder will only be available to the LTSC.

Summary of Work

For work order "C1948W10546(Ref#:01 Potential Privilege - All)," we will be processing 1 container of the following type: "Electronic Folder." We will be applying a label to each container received.

1 Electronic Folder will be processed with "Relativity Folder Updates" and the following tasks will be performed:

- Coordinator Review and Assign
- Create Hosting Job
- Move Documents
- Tech QC of Deliverable
- Coordinator QC/Sign-off

The following hosting jobs will be completed:

- **W10546-20037:** 0.00 GB consisting of 1494 docs, 0 pages, and 0 native files loaded to Relativity

+++++

IMPORTANT NOTICES: READ BEFORE APPROVING

- **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

- **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

- **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, *you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request.* If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

LTSC Litigation Work Plan Approval Request

Work Order: C1948W10575(Ref#:refolder)
Case Name: Edward Adams
Work Due On: 6/14/2016

To: Dan Czapko

Thank you for submitting a Preliminary Work Order (PWO) to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your PWO, we request your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #45485:

In the Edward Adams_II workspace, documents in the results of saved search "01 Potential Privilege - All" will be moved to the secured folder "Not For Review". The folder will only be available to the LTSC.

Summary of Work

For work order "C1948W10575(Ref#:refolder)," we will be processing 1 container of the following type: "Electronic Folder." We will be applying a label to each container received.

1 Electronic Folder will be processed with "Relativity Folder Updates" and the following tasks will be performed:

- Coordinator Review and Assign
- Move Documents
- Tech QC of Deliverable
- Coordinator QC/Sign-off

The following hosting jobs will be completed:

- **W10575-20099:** 0.00 GB consisting of 1018 docs, 0 pages, and 0 native files loaded to Relativity

+++++

IMPORTANT NOTICES: READ BEFORE APPROVING

• **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

• **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

- **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF**

CHANGE REQUESTS: The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. It would have to be someone with Admin access to get the information even in the indirect method. We certainly don't mind looking it up as that only takes a minute and it's always nice to chat with the MN crew.

Thanks!

Hi Dan.

I've added Cory to the Edward Adams_II workspace. There is technically a way you can view users in a workspace but it's not a direct way of getting the information. Usually it's just easier to email the coordinators or ping me.

Thanks!

Dan—

In reviewing emails on the Edward Adams II database, I'm noticing a few emails that went to an associate at the Adams Monahan law firm – the email address is cmumm@adamsmonahan.com.

When we did the first run of search terms to exclude potentially privileged emails from the database, adamsmonahan.com and adamsmonahan were both search terms. Can we figure out why it didn't capture some of these? We also need to run that one again and pull any hits.

Thanks.

LTSC Litigation Work Plan Approval Request

Work Order: C1948W11913(Ref#:move documents to Taint Review)
Case Name: Edward Adams
Work Due On: 10/24/2016

To: Dan Czapko

Thank you for submitting a work request to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your request, we ask your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #47717:

LTSC will move the 105,185 documents in the saved search W11913_Taint Review to the secured Taint Review folder.

Saved search W11913_Taint Review includes the results from the following saved searches:

- 00 Potential Privilege - All
- 00 Potential Privilege - General Terms
- 00 Potential Privilege - Specific Terms
- 01 Potential Privilege - All

Summary of Work

For work order "C1948W11913(Ref#:move documents to Taint Review)," we will be processing 1 container of the following type: "Electronic Folder." We will be applying a label to each container received.

1 Electronic Folder will be processed with "Relativity Folder Updates" and the following tasks will be performed:

- Coordinator Review and Assign
- Create Hosting Job
- Move Documents
- Tech QC of Deliverable
- Coordinator QC/Sign-off

Jobs

Hosting Jobs

The following hosting jobs will be completed:

- W11913-22128: 0.00 GB consisting of 105185 docs, 0 pages, and 0 native files loaded to Relativity database "Edward Adams_II"

IMPORTANT NOTICES: READ BEFORE APPROVING

• **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as

appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

- **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

- **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Work Order Completed

Dear Dan:

Your service request for LTSC processing, work order #C1948W11913(Ref#:move documents to Taint Review), has been fulfilled.

Please see the note below from Marc Fulkert, who invites your feedback on the work recently completed by LTSC ([click here](#) to complete the online feedback form and also feel free to contact me directly):

As the Litigation Technology Service Center COR, I would greatly appreciate any / all feedback so that we may continually improve our effort to meet the eDiscovery and document imaging needs of all USAOs going forward.

LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS: The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the

documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Sent: Friday, November 4, 2016 1:00 PM
To: Czapko, Daniel (USAMN)
Subject: Edward Adams_II

Hi Dan.

As we discussed I've rebuilt the dtSearch index for this workspace to include email address recognition. I've copied a portion of the search guide below on how to search for email addresses using this syntax. Please let me know if you have any questions.

6.4.1.2 Email address recognition

Email address recognition searches for text with the syntax of a valid email address, such as "sales@example.com". With this feature, you can search for a specific email address regardless of the alphabet settings for "@", ".", or other punctuation in the email address.

You can also use the word listing functions in dtSearch to enumerate all email addresses in a document collection. Wildcard expressions are supported in this function:

- mail(sales@example.com)
- mail(sa*@example.com)

To search for an email address, enter an email address between the parentheses in "mail()".

Thanks!

Hi Dan.

Can you review the saved search W12092_Remove from Taint and ensure it contains on the documents you want moved from the Taint Review folder? Basically I took the items we moved in the last request (W11913) and added a condition that the document not appear in your Keep in Taint – Email Search. Once you review this and confirm the results I can send the LWP to move the 105,185 documents in the results. Let me know if you have any questions.

Thanks!

Conflict of Interest	Edward Adams, Michael Monahan
USAO Matter No	2014R00312
Deadline	11/11/2016 12:00:00 AM (Internal)
Customer Has	A search titled "Keep in Taint - Email Search" of the Taint Review folder in the Edward Adams II project.
Requested Deliverable	I have a search of the Taint Review folder that needs to be applied to the latest batch that was moved to the folder. Hit docs from the search should remain in the Taint Review folder. The rest of the last batch (that does NOT have hits) should be moved back to the Edward Adams II folder for review.
Special Instructions	Call/email with any questions.

LTSC Litigation Work Plan Approval Request

Work Order: C1948W12092(Ref#:W12092_Remove from Taint)
Case Name: Edward Adams
Work Due On: 11/9/2016

To: Dan Czapko

Thank you for submitting a work request to EOUSA's Litigation Technology Service Center (LTSC). After reviewing your request, we ask your approval of the following proposed Litigation Work Plan (LWP).

Please read the following Summary of Work and Important Notices below **carefully**. The Summary of Work describes exactly how your Work Order will be fulfilled. Make sure that the Summary of Work is **accurate** and **complete**. Please also make sure you have read and understand the Important Notices below.

If you approve this LWP as it is written, please reply to this email and type "Approve" in the response.

If there is any change needed to this LWP as it is written, please reply to this email with updates needed in the response.

For LTSC Container #48045:

The LTSC will move documents in the results of saved search 'W12092_Remove from Taint' into the unsecured Edward Adams_II folder.

There are 105,185 items in the saved search.

Summary of Work

For work order "C1948W12092(Ref#:W12092_Remove from Taint)," we will be processing 1 container of the following type: "Electronic Folder." We will be applying a label to each container

received.

1 Electronic Folder will be processed with "Relativity Folder Updates" and the following tasks will be performed:

- Coordinator Review and Assign
- Create Hosting Job
- Move Documents
- Tech QC of Deliverable
- Coordinator QC/Sign-off

Jobs

Hosting Jobs

The following hosting jobs will be completed:

- W12092-22445: 0.00 GB consisting of 105185 docs, 0 pages, and 0 native files loaded to Relativity database "Edward Adams_II"

+++++

IMPORTANT NOTICES: READ BEFORE APPROVING

• **SECURE SHIPPING PROCEDURES:** Before you ship materials to the LTSC, please note that the LTSC requires strict compliance with the [Secure Shipping USAP, No. 3-13.200.005](#), and noncompliance may result in loss or damage to sensitive materials and require the filing of a formal Security Incident Report with your District Office Security Manager (DOSM) and others in accordance with the [LTSC USAP, No. 3-16.000.002 \(Part 6.B, "Project Security"\)](#). The Secure Shipping USAP mandates the use of either the new FedEx Secure Shipping Admin web portal or Registered Mail on all shipments of information protected from disclosure by law. Furthermore, such shipments must be packaged in accordance with the Secure Shipping USAP's dual-container requirements – using the special secure shipping tape/labels identified in USAP Attachment 1 as appropriate – and you must provide the LTSC with your shipment's tracking number(s) prior to shipping your materials. Also note that Electronically Stored Information (ESI) must be copied and encrypted per the LTSC USAP before shipment (do not send original ESI). Please contact your LTSC Project Coordinator for more information, and carefully review the [LTSC Shipping Requirements](#) for tips regarding how to securely ship your materials.

• **HARD COPY REASSEMBLY:** For projects involving the scanning of hard copy documents, the LTSC provides "physical unitization" services by inserting prep sheets : (1) where there are physical breaks among materials (e.g., staples, clips, rubber bands, etc); or (2) pursuant to clearly specified box/folder instructions from the District. Upon completion, documents will be returned to the folder/binder/etc from which they were removed, but staples, clips, rubber bands, etc. will not be reapplied. Rather, color-coded prep sheets will be included within the returned documents, and the prep sheets will contain markings evidencing the type of fastener that the LTSC removed.

• **LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:** The LTSC retains only temporarily the documents and electronic data that

Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Subject: Adams Database

Dan,

We need to run one more set of search terms on the "Adams II" email database in Relativity. This should be the final set. These are our search terms to cull this down to relevant documents. Unlike the searches that we ran for potentially privileged documents, the docs that hit on these search terms should remain in the database, and those that don't should be excluded. Once you have run them, let me know, and I will do some spot checking based on certain documents that I have already pulled.

Here are the terms:

Apollo
Diamond
ADI
ADGC
Gemstone
DL
RL
ADR
RBE
ESA
MRM
Scio
SDTC
Krossbow
Linares
Lancia
Zipkin
Nichols
LisaL
LMAInc
Mack
Rapello
Platt
Robb
Larson
McMahon
Bern
McPheely

Let me know if you have any questions.

Thanks,
David

LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS:

The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you. If you provide the LTSC electronic data on physical storage media (e.g., hard drives, CDs, etc.), the LTSC will return that physical storage media (with the data) to you. If you provide electronic data to the LTSC by copying the data to the LTSC's District file share, the data copied to the share will not be returned to you. Rather, data copied to the District file share will be deleted quickly—typically immediately after the data has been staged. In addition, all data the LTSC generates when processing hard copy documents or electronic data, *except data a District has requested be loaded into a hosting platform (i.e., Relativity or iCONNECT)*, will be removed from LTSC servers within 60 days of the fulfillment of your service request. Therefore, if you require modifications to an LTSC deliverable, it is imperative that you notify the LTSC as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you do not make modification requests within 60 days, a modification request will not receive priority over the LTSC's current workload, and you will have to submit a new Preliminary Work Order, send the

documents or electronic data to the LTSC again, and allow for the time needed for the LTSC to re-do all its prior processing work.

Work Order Completed

Dear Dan:

Your service request for LTSC processing, work order #C1948W13850, has been fulfilled.

Please see the note below from Marc Fulkert, who invites your feedback on the work recently completed by LTSC ([click here](#) to complete the online feedback form and also feel free to contact me directly):

As the Litigation Technology Service Center COR, I would greatly appreciate any / all feedback so that we may continually improve our effort to meet the eDiscovery and document imaging needs of all USAOs going forward.

LTSC RETENTION PRACTICES MANDATE PROMPT NOTIFICATIONS OF CHANGE REQUESTS: The LTSC retains only temporarily the documents and electronic data that Districts provide to the LTSC, as well as the electronic data that the LTSC generates in connection with processing those materials. As a result, if you require modifications to an LTSC deliverable, you must make the modification request as soon as possible, and in no event later than 60 days of the fulfillment of your request. If you send the LTSC hard copy documents, the LTSC will return those documents to you.
